

ADCL - CROSSCHECK

The ADC - CROSSCHECK is a tool that allows to do a complete comparison between the AD STATUS excel file that we work on, and the ADCL update from Airbus. The result is a table with all the rows that have been added and removed, and cells that have been modified.

How to use it

In order to use this tool, first is necessary to select the AD STATUS excel file on the left-hand side (blue circle) and the ADCL update from Airbus on the right-hand side (red circle). Then, once both files are uploaded correctly, the next step is to select the sheet to do the cross-check. The excel sheet selection has to be done for both files. Finally, whit everything set, the CROSS-CHECK button will get active, and by clicking it, the result will be displayed at the bottom of the screen.

ADCL VERSION - CROSS-CHECK

WARNING!!! UNDER TEST

AD statuses

Select the excel file:

Browse... A350-941 MSN 00235 ... BW20 FAA BW20.xlsm

Select the sheet:

AIRFRAME

ADCL update

Select the excel file:

Browse... AD STATUS MSN 235.xlsm

Select the sheet:

AIRFRAME

CROSS-CHECK

The results are visible on the webpage, but also downloadable to excel. To download the file with the cross-check result, click the excel icon at the right top.

The output of this tool will provide the following information:

- **ACTION**: the type of finding on the cross-check. Can be “added”, “removed” or “modified”.
- **AD REF**: the “AD REF” value of the finding.
- **EQUIVALENT AD**: the “EQUIVALENT AD” value of the finding.
- **EXCEL SHEET LINE**: The row number of the excel sheet where it is found.
- **AD GROUP LINE**: The row number of the AD group where it is found. The AD group is when some rows are merged but have the same “AD REF”.
- **COLUMN**: the column name where the modification has been found. This information together with the line, allows to locate the cell. There is a value here only when “ACTION” is “modified”.

If there is some error during the process, or nothing is displayed on the screen after clicking the button, first check that the excel file is the correct one and its format is also correct, and even if after that the problem persists, please contact the developer to fix the bug.
